Powder Technology 82 (1995) 361–363

POWDER TECHNOLOGY

Subject Index of Volume 82

Acoustic waves
the influence of the frequency of acoustic waves on sound-assisted fluidization of beds of fine particles, 219
Adaptive control
adaptive control: state of the art and an application to a grinding process, 59
Agglomeration
coal agglomeration and its effect on bulk density, 177
Alkaline flooding
use of acidobasic indicators to detect interfacial reactivity during alkaline flooding, 205
Aluminum
metal powder granulation in a plasma-spouted/fluidized bed, 347
Attrition studies
solids flow imaging and attrition studies in a pneumatic conveyor, 105

Binary particles
particle mixing and separation in a binary solids floating fluidized bed, 279
Bubble-free regime
fluidization of FCC powders in the bubble-free regime: effect of types of gases and temperature, 269

Capacitance sensors
solids flow imaging and attrition studies in a pneumatic conveyor, 105
Circulating beds
lateral solid mixing measurements in circulating fluidized beds, 153
gas–solids mixing and flow structure modeling of the upper dilute zone of a circulating fluidized bed, 317
Circulating fluidized bed
turbine meter for the measurement of bulk solids flowrate, 145
Coal
coal agglomeration and its effect on bulk density, 177
some issues in modelling bubbling and circulating fluidized-bed coal combustors, 301
Combustion
some issues in modelling bubbling and circulating fluidized-bed coal combustors, 301
Comminution
newer energy-efficient approach to particle production by comminution, 51
Compression
pure Paracetamol for direct compression. Part II. Study of the physicochemical and mechanical properties of sintered-like crystals of Paracetamol, 129
Compression waves
compression and rarefaction waves in granular flow, 231
dynamic waves in fluidized beds, 255

Computer modeling
gas–solids mixing and flow structure modeling of the upper dilute zone of a circulating fluidized bed, 317
Concentration
theory of sound propagation in suspensions: a guide to particle size and concentration characterization, 115
Control
on the difficulties of implementing particle size control in particulate processes, 13
Crack growth
fatigue crack growth in flyash compacts, 169
Crystallization
pure Paracetamol for direct compression. Part I. Development of sintered-like crystals of Paracetamol, 123
Crystallizers
design and experimental evaluation of stabilizing feedback controllers for continuous crystallizers, 21
Crystal structure
pure Paracetamol for direct compression. Part I. Development of sintered-like crystals of Paracetamol, 123
pure Paracetamol for direct compression. Part II. Study of the physicochemical and mechanical properties of sintered-like crystals of Paracetamol, 129

Dissolution
pure Paracetamol for direct compression. Part II. Study of the physicochemical and mechanical properties of sintered-like crystals of Paracetamol, 129
Dynamic waves
dynamic waves in fluidized beds, 255

Elastic waves
dynamic waves in fluidized beds, 255
Energy efficiency
newer energy-efficient approach to particle production by comminution, 51
Energy saving
energy saving by modification of the vibration mill, 191

Fatigue
fatigue crack growth in flyash compacts, 169
FCC powders
fluidization of FCC powders in the bubble-free regime: effect of types of gases and temperature, 269
Feedback controllers
design and experimental evaluation of stabilizing feedback controllers for continuous crystallizers, 21
Flotation
on the difficulties of implementing particle size control in particulate processes, 13
Flotation control
role of kinetics in modelling and control of flotation plants, 69
Flotation plants
role of kinetics in modelling and control of flotation plants, 69

Elsevier Science S.A.

Fluctuation measurement
propagation of pressure waves and forced oscillations in gas–solid fluidized beds and their influence on diagnostics of local hydrodynamics, 239
Fluidization
the influence of the frequency of acoustic waves on sound-assisted fluidization of beds of fine particles, 219
fluidization of FCC powders in the bubble-free regime: effect of types of gases and temperature, 269
Fluidized beds
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
lateral solid mixing measurements in circulating fluidized beds, 153
dynamic waves in fluidized beds, 255
particle mixing and separation in a binary solids floating fluidized bed, 279
some issues in modelling bubbling and circulating fluidized-bed coal combustors, 301
gas–solids mixing and flow structure modeling of the upper dilute zone of a circulating fluidized bed, 317
large-scale fluidized bed physical model: methodology and results, 331
metal powder granulation in a plasma-spouted/fluidized bed, 347
Flyash compacts
fatigue crack growth in flyash compacts, 169
Forced oscillations
propagation of pressure waves and forced oscillations in gas–solid fluidized beds and their influence on diagnostics of local hydrodynamics, 239
Frequency
the influence of the frequency of acoustic waves on sound-assisted fluidization of beds of fine particles, 219

Gas concentration profile
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
Gas-fluidized bed
heat transfer coefficients between gas fluidized beds and immersed spheres: dependence on the sphere size, 293
Gas–solid fluidized beds
propagation of pressure waves and forced oscillations in gas–solid fluidized beds and their influence on diagnostics of local hydrodynamics, 239
Gas-to-particle conversion
strategies for control of ceramic powder synthesis by gas-to-particle conversion, 79
Granular flow
turbine meter for the measurement of bulk solids flowrate, 145
compression and rarefaction waves in granular flow, 231
Granulation
population balance modelling of drum granulation of materials with wide size distribution, 37
metal powder granulation in a plasma-spouted/fluidized bed, 347
Grid zone
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
Grinding
on the difficulties of implementing particle size control in particulate processes, 13
Grinding circuit
adaptive control: state of the art and an application to a grinding process, 59

Heat transfer coefficient
heat transfer coefficients between gas fluidized beds and immersed spheres: dependence on the sphere size, 293
Homogeneity
determination of homogeneity scale in ordered and partially ordered mixtures, 93
Hydrodynamics
large-scale fluidized bed physical model: methodology and results, 331

Identification
adaptive control: state of the art and an application to a grinding process, 59
Immersed spheres
heat transfer coefficients between gas fluidized beds and immersed spheres: dependence on the sphere size, 293
Interfacial reaction
use of acidobasic indicators to detect interfacial reactivity during alkaline flooding, 205
Iron
metal powder granulation in a plasma-spouted/fluidized bed, 347

Jet height
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
Jets
large-scale fluidized bed physical model: methodology and results, 331

Kinetics of flotation
role of kinetics in modelling and control of flotation plants, 69

Mathematical modelling
large-scale fluidized bed physical model: methodology and results, 331
Metal powders
metal powder granulation in a plasma-spouted/fluidized bed, 347
Mixing
determination of homogeneity scale in ordered and partially ordered mixtures, 93
lateral solid mixing measurements in circulating fluidized beds, 153
particle mixing and separation in a binary solids floating fluidized bed, 279
gas–solids mixing and flow structure modeling of the upper dilute zone of a circulating fluidized bed, 317
Modelling
population balance modelling of drum granulation of materials with wide size distribution, 37
some issues in modelling bubbling and circulating fluidized-bed coal combustors, 301
Models
determination of homogeneity scale in ordered and partially ordered mixtures, 93
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
Moisture
coal agglomeration and its effect on bulk density, 177

Oil recovery
use of acidobasic indicators to detect interfacial reactivity during alkaline flooding, 205
Optical fiber sensor
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135

Order
determination of homogeneity scale in ordered and partially ordered mixtures, 93

Packed beds
a relation for the void fraction of randomly packed particle beds, 197
Packing
coal agglomeration and its effect on bulk density, 177
Paracetamol
pure Paracetamol for direct compression. Part I. Development of sintered-like crystals of Paracetamol, 123
pure Paracetamol for direct compression. Part II. Study of the physicochemical and mechanical properties of sintered-like crystals of Paracetamol, 129
Particle size
on the difficulties of implementing particle size control in particulate processes, 13
theory of sound propagation in suspensions: a guide to particle size and concentration characterization, 115
Particle velocity
experimental study of gas and particle behavior in the grid zone of a jetting fluidized bed cold model, 135
Particulate processes
conference summary paper: Control of Particulate Processes III, 3
Plasma
metal powder granulation in a plasma-spouted/fluidized bed, 347
Pneumatic conveyor
solids flow imaging and attrition studies in a pneumatic conveyor, 105
Population balance
population balance modelling of drum granulation of materials with wide size distribution, 37
Porosity distribution
particle mixing and separation in a binary solids floating fluidized bed, 279
Powder synthesis
strategies for control of ceramic powder synthesis by gas-to-particle conversion, 79
Predictive control
adaptive control: state of the art and an application to a grinding process, 59
Pressure waves
propagation of pressure waves and forced oscillations in gas–solid fluidized beds and their influence on diagnostics of local hydrodynamics, 239
Process control
design and experimental evaluation of stabilizing feedback controllers for continuous crystallizers, 21
Process dynamics
role of kinetics in modelling and control of flotation plants, 69
Process models
role of kinetics in modelling and control of flotation plants, 69
Pseudo-homogeneous models
dynamic waves in fluidized beds, 255

Rarefaction waves
compression and rarefaction waves in granular flow, 231

Scale-up
large-scale fluidized bed physical model: methodology and results, 331
Segregation
particle mixing and separation in a binary solids floating fluidized bed, 279
Sensors
design and experimental evaluation of stabilizing feedback controllers for continuous crystallizers, 21
Shape
a relation for the void fraction of randomly packed particle beds, 197
Shocks
compression and rarefaction waves in granular flow, 231
Size distribution
population balance modelling of drum granulation of materials with wide size distribution, 37
a relation for the void fraction of randomly packed particle beds, 197
Solids flow imaging
solids flow imaging and attrition studies in a pneumatic conveyor, 105
Solids flowrate meter
turbine meter for the measurement of bulk solids flowrate, 145
Sound propagation
theory of sound propagation in suspensions: a guide to particle size and concentration characterization, 115
Spouted bed
metal powder granulation in a plasma-spouted/fluidized bed, 347
Stability
compression and rarefaction waves in granular flow, 231
Suspensions
theory of sound propagation in suspensions: a guide to particle size and concentration characterization, 115

Tapered column
particle mixing and separation in a binary solids floating fluidized bed, 279
Tomography
solids flow imaging and attrition studies in a pneumatic conveyor, 105
Tracer methods
role of kinetics in modelling and control of flotation plants, 69
Turbine
turbine meter for the measurement of bulk solids flowrate, 145

Vibration mill
energy saving by modification of the vibration mill, 191
Voidage
a relation for the void fraction of randomly packed particle beds, 197
Voidage prediction
fluidization of FCC powders in the bubble-free regime: effect of types of gases and temperature, 269
